Q. 8.

complexes?

## FEDERAL PUBLIC SERVICE COMMISSION COMPETITIVE EXAMINATION-2022 FOR RECRUITMENT TO POSTS IN BS-17 UNDER THE FEDERAL GOVERNMENT

Roll Number

## **CHEMISTRY, PAPER-I**

PART-I(MCQS): MAXIMUM 30 MINUTES  NOTE: (i) Part-II is to be attempted on the separate Answer Book.  (ii) Attempt ONLY FOUR questions from PART-II. ALL questions carry EQUAL marging in All the parts (if any) of each Question must be attempted at one place instead of a places.  (iv) Write Q. No. in the Answer Book in accordance with Q. No. in the Q.Paper.  (v) No Page/Space be left blank between the answers. All the blank pages of Answer I be crossed.  (vi) Extra attempt of any question or any part of the question will not be considered.  (vii) Use of calculator is allowed.  PART-II  Q. 2. (a) Derive Schrodinger wave equation for particle in one dimensional box.  (b) Discuss Heisenberg's Uncertainty principle.  (c) What is corrosion? How it can be prevented?  Q. 3. (a) What is Stereoisomerism? Discuss it with reference to coordination complexes.  (b) Define and explain Jahn-Teller theorem.  (c) Write a short note on column chromatography.  Q. 4. (a) What is Valence Bond theory? How does this theory explains the structure of inorganic molecules?  (b) Define and explain the phenomenon of resonance in inorganic compounds.  (c) Write some general characteristics of actinides.  Q. 5. (a) What is photoelectric effect? How quantum mechanics explains this effect?  (b) What is wave-function? Discuss its interpretation given by Born.  (c) What are fuel cells? Discuss their working with suitable examples.  Q. 6. (a) What are electron-deficient compounds? Discuss bond in such compounds.  (b) Define and explain the VSEPR model to explain the geometry of inorganic substances.  (c) Discuss variation in oxidation states of lanthanides.			<u>CHEWIST</u>	KI, I ZI EK-I			
(ii) Attempt ONLY FOUR questions from PART-II. ALL questions carry EQUAL mai (iii) All the parts (if any) of each Question must be attempted at one place instead of a places.  (iv) Write Q. No. in the Answer Book in accordance with Q. No. in the Q.Paper.  (v) No Page/Space be left blank between the answers. All the blank pages of Answer I be crossed.  (vi) Extra attempt of any question or any part of the question will not be considered.  (vii) Use of calculator is allowed.  PART-II  Q. 2. (a) Derive Schrodinger wave equation for particle in one dimensional box.  (b) Discuss Heisenberg's Uncertainty principle.  (c) What is corrosion? How it can be prevented?  Q. 3. (a) What is Stereoisomerism? Discuss it with reference to coordination complexes.  (b) Define and explain Jahn-Teller theorem.  (c) Write a short note on column chromatography.  Q. 4. (a) What is Valence Bond theory? How does this theory explains the structure of inorganic molecules?  (b) Define and explain the phenomenon of resonance in inorganic compounds.  (c) Write some general characteristics of actinides.  Q. 5. (a) What is photoelectric effect? How quantum mechanics explains this effect?  (b) What is wave-function? Discuss its interpretation given by Born.  (c) What are fuel cells? Discuss their working with suitable examples.  Q. 6. (a) What are electron-deficient compounds? Discuss bond in such compounds.  (b) Define and explain the VSEPR model to explain the geometry of inorganic substances.  (c) Discuss variation in oxidation states of lanthanides.  Q. 7. (a) What is Nernst equation? Explain it.  (b) Define and explain Kohlrausches's law.				` '	MAXIMUM MARKS = 20 MAXIMUM MARKS = 80		
Q. 2. (a) Derive Schrodinger wave equation for particle in one dimensional box.  (b) Discuss Heisenberg's Uncertainty principle.  (c) What is corrosion? How it can be prevented?  Q. 3.
